Concord Parkway Animal Hospital  
MEDICAL CONDITION

Page: 1

Client: Salisbury Department, Patient: Zuul

Species: CANINE Breed: Dutch Shepherd

Sex: M

Age: 3y Weight: 64.30

**SUBJECTIVE SECTION**

Semi annual exam  
is doing well  
had an incident that involved his neck in October of 2020  
is not having any clinical signs at this time

**OBJECTIVE SECTION**

Bright and alert, very active, does not want to hold still  
body score of 4.5 out of 9  
mm are pink  
light tartar on his carnassial teeth  
heart sounds are normal  
is panting due to excitement but no obvious abnormal lung sounds  
eyes appear normal, pupils are equal and responsive  
both eyes equal in response to movement side to side and up and down  
I can clearly see both retinas  
ears: mild otitis externa bilateral, mild grey exudate bilateral, suspect a yeast infection  
integument appears normal  
musculoskeletal system appears normal  
no discomfort on flexion and extension of his neck, or lateral movement to the right and left  
well muscled generalized  
no pain on flexion or extension of his hips  
stifles appear normal  
shoulders are well muscled, no discomfort on manipulation  
normal CP all 4 limbs  
normal tracking when walking straight and circling to either side  
Urogenital system appears normal, is intact

**Diagnosis**

suspect allergic otitis externa , will treat symptomatically with Zymox HC  
no obvious musculoskeletal or neurologic damage from his incident in October

I do not see any reason that Zuul should not be trained for police work

I will send home a bottle of Zymox HC to apply to both ears as prescribed on the label

- Recommendations: 1) routine heartworm prevention (monthly or bi-annual Pro Heart injections) and appropriate flea/tick control (oral, topical, Seresto collar).  
2) home dental care - brushing with dog tooth paste, oral gel, TDC gel, Tartar Control diet or treats.  
3) regular exercise and stimulation away from the usual environment to keep your pet well rounded and in good body condition.  
4) follow dietary recommendations to maintain a healthy body weight.
