CITY MANAGER’S COMMENTS

(a) Update – Quality of Drinking Water

City Manager Lane Bailey commended employees for their hard work during the frigid temperatures and water main breaks. He introduced Salisbury-Rowan Utilities (SRU) Director Jim Behmer. Mr. Behmer introduced Water Treatment Plant Chemist Alan Fowler. Mr. Behmer stated an asbestos cement pipe (AC pipe) was the preferred choice of material in the 1960s and 1970s. He stated the Environmental Protection Agency (EPA) banned its use because of pipe materials, mining, and production. He stated the AC pipes makeup 15% to 20% of United States water distribution lines and noted Salisbury has 10.5% of AC pipes. He stated the estimated life span of an AC pipe is 50 to 70 years and they pose no threat of contamination because they are underground. Mr. Behmer commented on recent water main breaks and noted no AC pipes were involved in those breaks. He commented replacement of AC water pipes would pose more threat to workers due to the inhalation during the construction process.

Salisbury–Rowan Treatment plant chemist Alan Fowler stated the EPA sets maximum contaminant levels, and according to EPA that level is 7x10 microliters fibers per liter. He noted SRU is on a nine year monitoring plan, and in 2012 one asbestos fiber was collected during a million sample. He clarified one fiber equals 10 fibers per liter and is well under the EPA standard. He commented samples are taken from the county and East Spencer treatment plants. He noted SRU also performs test samples including, Escherichia (E. coli), Coliform bacteria, metals and other non-compliant monitoring samples. He stated certified water treatment operators are on site 24 hours a day, 7 days per week and water test samples are taken every 15 minutes.

Councilmember Sheffield thanked Mr. Fowler for the presentation and for his help in keeping the water clean. She asked if the nine year samples are taken in-house. He explained SRU facility contracts the testing to the North Carolina Department of Environmental Quality (NCDEQ). Mr. Behmer commented that municipalities have higher regulations than water
bottling companies.

Councilmember Miller asked if asbestos poses a concern to the water system. Mr. Fowler and Mr. Behmer replied it does not.
